The history that follows, from Greece and Rome, where citizens focused much of their leisure time on perfecting, bathing, or just writing about the model athletic body, through Europe in the middle ages and the following centuries, is full of intriguing customs, convoluted treatises, and many reversals.

Project MUSE Mission Project MUSE promotes the creation and dissemination of essential humanities and social science resources through collaboration with libraries, publishers, and scholars worldwide. Even so, Smith might have given more

and earlier attention to working and poor people. Scholars invested in specific periods, from antiquity to the present day, who is more interested in evolving grooming practices, attitudes toward those practices, and their impact on the way people lived their lives than she is in judging past societies against some arbitrary standard of cleanliness. In addition, the narrative favors European and specifically British phenomena; Americans get credit along with the French for developing the mass market in cosmetics but not for creating flawed but vital public regulators such as the USDA, FDA and EPA, which have served as models for more practical agencies and oversight in Europe.
